Task 7

7A

Decade	GDP per Capita	Previous Decade	Decade Change
1900	1,997.1	-	-
1910	1,949.7	1,997.1	-2.4%
1920	2,297.8	1,949.7	17.9%
1930	2,679	2,297.8	16.6%
1940	2,976.8	2,679	11.1%
1950	3,868.6	2,976.8	30.0%
1960	6,236.2	3,868.6	61.2%
1970	10,740.1	6,236.2	72.2%
1980	13,892.3	10,740.1	29.3%
1990	19,552.686	13,892.3	40.7%
2000	24,399.769	19,552.686	24.8%
2010	25,583.808	24,399.769	4.9%
2020	27,276.94	25,583.808	6.6%

Portugal's GDP per capita grew around fourteen times since 1900. The decades that had the biggest growth were the 1970s and the 1960s, and the lowest ones were 1910 and 2010. The slow growth in 2010 can be explained with the 2008 crisis, and in the 2020s the change is low partially because of covid and because it doesn't cover the data from the whole decade, only part of it. The growth in the 1960s might be due to the industrialization and the trade through EFTA, and in the 1970s it's probably the continued growth of the industrialization and trade.

Country	1900	1910	1920	1930	1940	1950	1960	1970	1980	1990	2000	2010	2020
Belgium	306.6%	312.9%	320.3%	288.6%	240.2%	251.2%	214.3%	184.1%	173.5%	150.4%	147.1%	152.8%	148.6%
France	233.7%	256.3%	274.4%	257.2%	190.2%	251.6%	230.4%	193.9%	180.1%	151.1%	144.1%	145.8%	138.4%
Germany	246.4%	256.2%	238.4%	250.2%	236.2%	227.3%	228.4%	182.1%	172.6%	146.6%	150.0%	173.4%	168.4%
Greece	120.0%	114.2%	142.0%	145.9%	85.0%	102.1%	110.6%	114.2%	106.4%	89.4%	104.6%	91.5%	86.5%
Ireland	-	223.7%	182.2%	175.6%	166.3%	155.8%	129.3%	107.1%	107.0%	127.0%	190.2%	204.8%	211.0%
Italy	176.9%	197.8%	187.7%	175.4%	144.3%	187.9%	195.6%	163.1%	162.6%	145.2%	141.5%	134.3%	126.4%
Spain	139.0%	153.0%	158.0%	126.4%	114.9%	113.9%	114.9%	112.1%	109.7%	110.9%	124.3%	126.5%	119.2%

The other countries had a considerable lead in terms of GDP per capita and were richer for most of the decades, but the gap became smaller as time went on. Portugal managed to stay ahead of Greece in the 1940s, 1990s, 2010s and 2020s, but all the other countries stayed ahead of Portugal at all times, except Ireland in 1900, because it had no recorded data.

7C

Decade	PT GDPpc	WE GDPpc	PT to WE Ratio
1900	1,997.1	4,069.248	49.08%
1910	1,949.7	4,195.55	46.47%
1920	2,297.8	4,944.846	46.47%
1930	2,679	5,431.904	49.32%
1940	2,976.8	5,005.609	59.47%
1950	3,868.6	7,128.6	54.27%
1960	6,236.2	10,899.255	57.22%
1970	10,740.1	16,210.935	66.25%
1980	13,892.3	20,082.764	69.18%
1990	19,552.686	25,716.681	76.03%
2000	24,399.769	34,925.421	69.86%
2010	25,583.808	37,617.067	68.01%
2020	27,276.94	38,906.332	70.11%

The data shows that Portugal's GDP pc converged from around 49% to 76% and had its peak in 1990, and then stalled around 70% in 2020s. The strongest gains were from 1960 to 1970 and from 1980 to 1990, possibly from the industrialization as stated before, and the entrance in the European Economic Community in 1986, respectively.

7D

Country	1990	2000	2010	2020
Portugal	19,552.686	24,399.769	25,583.808	27,276.94
Czechia	14,339.543	21,593.434	28,432.673	31,355.107
Hungary	10,318.861	17,179.022	22,940.764	27,876.406
Poland	9,435.852	15,719.688	24,288.037	30,577.735
Romania	5,788.942	11,429.377	19,657.042	25,700.067
Estonia	14,252.109	21,191.053	24,511.512	29,609.378
Latvia	10,470.304	16,110.737	21,717.345	26,470.661
Lithuania	10,090.467	15,715.313	23,756.185	30,130.731

In terms of GDP per capita, these countries all started below the GDP pc of Portugal, but in 2010s most of them had gotten close or surpassed Portugal in that regard, and in 2020s, all but Romania and Latvia had surpassed Portugal's GDP pc, remaining close to surpassing it. This rise in GDP per capita might be due to the recovery these countries had after the

end of communism, and the help from the European Union, while Portugal's growth stalled around the 2010s.
